

Pull Request Info

A pull request is a way to work on a file without actually changing it on github. It is similar to suggesting changes, but also usually involves creating a new branch. This branch is separate from the main branch, so the official version of the software doesn't change until an admin merges it. This [page](#) may be helpful if you're a beginner

Instructions on how to make a pull request on the next page.

```

Click on the edit icon, which is shaped like a pencil. Then, make whatever changes you like.

Once you're done, scroll to the very bottom, select create a new branch..., and click "Propose changes".

Add comments if you would like and click "Create pull request".
